Hey Selena,

Probably the best way to get daily updates is to look Jim Willett in. He's about as close to the situation as a person can be. I know that the Minister of Transportation has been on top of this like a hawk as well. I've cc-ed Jim Willett.

But of course we all know that the Premier's office will naturally have been calling the RCMP every single day to get updates and pressure them into taking action to end the threat to our 24 hour port right? ;)

Today I've been buried at my desk and haven't had time to chase down news. I drove down yesterday and it was fairly subdued. Gale force winds. 50 vehicles at the Milk River check-point. Another 50 or so left down at Coutts.

Peter C.

Hi Trevor and Peter.

Our Branch is asking for daily reports on updates to the Coutts border blockade.

Do you have anything else you would like to share? Would you be so kind to pass on anything that comes across your desks that would be key intel/anecdotal information?

Peter, I understand Dominic (copied) has also been in touch. Perhaps to streamline communication, we all keep each other in the loop using this email thread?

Thank you for any help you can provide on this...the intel is valuable and much appreciated.

Selena
